Asset Tagging

Client: World Health Organization | Yango

Asset tagging empowers your clients with a centralized, searchable digital database of all their physical assets — from equipment and inventory to IT hardware and office supplies. By assigning unique tags (barcodes, QR codes, or RFID), each item becomes traceable, verifiable, and auditable. This reduces loss, improves accountability, and streamlines maintenance and lifecycle management. With Impulse Tech's solution, clients gain real-time visibility, simplified reporting, and a foundation for smarter decision-making across departments.

What Are the Benefits of Asset Tagging

This system gives clients real-time visibility into their assets, enabling:

- Accurate tracking across locations and departments
- Instant verification of ownership, condition, and status
- Streamlined audits and compliance reporting
- Simplified maintenance and lifecycle management
- Reduced loss and redundancy through better oversight
